Dr. Supamas Trivisvavet President

Message from the Board of Directors

The year 2021 has been another year for CH. Karnchang's sustainable management. We are committed to our good corporate governance with honesty, transparency, morals, and ethics of business operations and management. This year, we received a plaque of honor from the Stock Exchange of Thailand as a listed company on the list of sustainable stocks, "Thailand Sustainability Investment 2021" (THSI) for the year 2021 in the real estate and construction sector. This signifies our sustainable business in all three dimensions with good responses to all stakeholders. In the past year, we faced many challenges, especially the effect of the COVID-19 epidemic since 2020, resulting in the income and backlog of CH. Karnchang. However, we have experienced little impact due to our effective operations with efficient cost management, use of modern construction technology, and timely risk management for investment in the infrastructure business, resulting in our maintaining profit margins and generating consistent returns to shareholders. It is the equilibrium towards sustainable and fair benefits for all stakeholders.

Sustainability Report

CH. Karnchang has been moving towards sustainability by combining three dimensions of concepts: economic, social, and environmental, as part of our business strategy. We have also expanded our networks to supply chains with connection to national strategies for sustainability, in compatible to the United Nations (Sustainable Development Goals: SDGs). In 2022, CH. Karnchang has set operational goals for concrete results and measurable achievements in economic, social, and environmental aspects as follows:

Economic Dimension: In 2021, the expansion rate of government construction was 6% higher than the previous year due to supporting factors from the government's mega-project promotion. The coronavirus outbreak has impacted business operations of all organizations. The construction revenue and backlog did not meet targets due to the temporary halt of construction as a result of government measures to reduce the spread of coronavirus, causing delays in the bidding of big projects. Nevertheless, we still maintained a stable profit margin and continued to receive income from profit sharing and dividends from the Group's companies with our ongoing financial stability. We have foreseen to generate construction income in 2022 of approximately 12,000–15,000 million baht, with a gross margin of 7–8 %. Furthermore, we have prepared to accommodate the changes so as to take on future risks that may arise with our more efficiency of operations, along with better management of costs, innovative development, and other operational systems.

Social Dimension : Since the past year, CH. Karnchang has emphasized our responsibility to support the communities, especially those affected by COVID-19. We have joined forces with companies in the CH. Karnchang group to donate funds for the construction of patient wards for the urgent field hospital with a purchase of tools and medical equipment for Chulalongkorn Hospital, the Thai Red Cross Society. Additionally, the Company has also collaborated with the Doctor Lab Panda page to create a project, "BioSafe Sampling Trucks," to help proactively detect infections in the at-risk groups more quickly and efficiently. In the meantime, CH. Karnchang has continued its project for community innovation by selecting the four best innovations, with funding support for innovative inventions, community artisans, training and meeting with experts to develop skills in four dimensions. These include technical, engineering, product design, marketing and cost management. Most importantly, CH. Karnchang believes that "the inventions from the creativity and talents of Thai people in various communities across the country can possess both potentials and opportunities towards higher capacities to effectively and efficiently solve problems in each locality. These potential innovations originate from people in the community but can promote a wide range of social impacts."

Environmental Dimension : Following the preliminary measures by the government to control climate problems from the COP 26 (Conference of the Parties), which was a leadership meeting of the Parties to the United Nations Convention on Climate Change to help bring climate change problems to a global level, CH. Karnchang has planned for the cooperation between project offices and head offices for clear and concrete implementation within the next 1–2 years. In the past year, several measures for pollution control have been continuously implemented and strictly practiced according to the specified criteria by laws. Despite some complaints from communities nearby the construction projects, CH. Karnchang could resolve and manage all the cases to ensure that our construction shall be managed to avoid negative social and environmental impacts, with community acceptance. CH. Karnchang is committed to being a leader in the construction business that operates according to the sustainability framework with on-time delivery of work, with emphasizing on the social and the environment aspects for truly sustainable business operations.

Sustainability is important for business operations. Following our missions and corporate values, we have operated with responsibility to the community, environment, and nation. Meanwhile, at the heart of sustainable corporate operations is the management of all issues with transparency, accountability, and professionalism, in compliance with good corporate governance principles. It is our aspiration to operate along with social and environmental development, with an organizational strategy towards stable and sustainable growth.

On behalf of the Board of Directors and the management team, we would like to thank you for the trust of all stakeholders in CH. Karnchang with confidence, trustfulness, and support as always. We are confident that CH. Karnchang is taking steps forward with strength and commitment to perform business for sustainable growth and fruitful engagement with all sectors towards the achievement of sustainable development goals. We are well prepared in handling changes effectively. Thanks to everyone in both the public and private sectors, including all employees who are the essential driving force for CH. Karnchang. We are committed to enhancing our responsibility in business operations with good management according to good corporate governance principles in economic, environmental, and social dimensions for truly value-added quality and sustainability to society.

Business Structure

Construction Business

The construction business operations of the company, its subsidiaries and joint ventures can be divided into two natures, namely

Main Contractor

The company directly submits proposals in its own name, as contractor through bidding process or negotiation, to project owners. In case of a large-scale project, which requires specialized foreign companies for joint operation, the company submits proposals in cooperation with specialized foreign companies in accordance with the requirements of the project owners. In the acceptance of projects in this manner, the company does not solely carry out the entire construction work, but subcontracts parts of such work. In the nomination of subcontractor (s), the Company takes into account the creditability and previous achievements of the subcontractors, without reliance upon or adherence to any particular subcontractor.

Subcontractor

CH. Karnchang accepts subcontract work from other main contractor that is awarded the work directly from project owner. Most works of this nature will involve a production process utilizing large-sized and sophisticated machinery, which are usually operated by foreign companies. CH. Karnchang will consider accepting subcontract work from companies with reputation and good financial standing, so as to enable it to have the opportunity to accept transfer of technology in respect of engineering, production process and management, as well as creating business alliance with qualified capability to carry out large-scale projects which require more advanced technology in the future.

Construction Business

Infrastructure Investment

In addition to the construction business, the company also has invested in regional, comprehensive infrastructure project development business. Currently, the company has invested in mass rapid system, water system, and energy system. Based on the said manner of the infrastructure investment, the definition of each respective from can be described below.

1. BOT (Build-Operate-Transfer)

Private entity shall be granted the right under a concession agreement from the government for investment in construction and implementation to derive returns within a specified period and during the implementation, the ownership of the property shall remain vested in the private entity. After the end of the concession period, the ownership of the invested property shall be transferred to the government in consideration of the grant of the concession.

2. BTO (Build-Transfer-Operate)

Private entity shall carry out construction and management by its own investment. The ownership of the invested property is vested in the private entity. However, the private entity shall have an agreement with the government to guarantee revenue on a long term basis, whereby the government agency shall purchase goods during the term of the agreement, and upon expiration of the concession period, such property shall remain vested in the investing company.

3. BOO (Build-Own-Operate)

Private entity shall carry out the design, investment and construction of property, the ownership of which shall be transferred to the government immediately after the construction completion. The private entity shall be granted the right to utilize such invested property under the concession agreement to derive returns within a specified period. During the period the Company is still entitled to utilize such property under the concession period, the company such property in the form of the right to utilize, which is amortized throughout the concession period.

4. BOOT (Build-Own-Operate-Transfer)

Private entity shall be granted the concession by the government for financing, design, construction, and service operations during the specified period of time, provided that the ownership of the property shall be transferred to the government upon the end of such specified period of time.

The Company's Overall Operational Operational Policy

Vision

To be the leader in construction business and the pre-eminent and comprehensive basic infrastructure developer in the region.

Mission

• Deliver quality work for our customers while committed to creating work that contributes to the society and country with good returns to our shareholders and providing fair treatment to all our stakeholders.

• Manage our business with professionalism and in accordance with the guidelines of Good Corporate Governance.

• Be responsible to the community, society and the country.

To ensure the accomplishment of the company's operation for the utmost benefits of all stakeholders, the company has thus adopted the operational policies subject to the principles as follows : • Develop human capital and organization on a continuous and consistent basis.

Core Values

- Q : Quality of Services
- C : Customer Satisfaction
- I : Integrity
- S : Social and Environmental Responsibilities
- T : Teamwork

Strategies: Sustainable growth and stability

• Selecting projects with good contribution to the society and our country and with fair business returns.

• Manage construction projects under the principles of effective cost management, timeliness and quality of work.

• Build the business synergy in the construction business and investments in basic infrastructure projects that contribute to the country's development for the purpose of risk management and increase in long-term returns to shareholders.

• Expand to the regional market with an emphasis on Southeast Asia.

• Develop organizational capacity-human capital and management structure to increase the company's competitiveness.

• Manage and develop advanced technology, including knowledge to ensure the company's comparative advantage.

To ensure the Company's business operations in compliance with the policies, the Company has complied with the strategies and action plans in 2021 as follows:

1. The Company carried out construction and performed various related works, with progress according to schedule;

2. The Company followed the procedures under every project agreement;

3. The Company conducted feasibility studies and made preparations for investments in various projects;

4. The Company maintained its liquidity and efficiently managed short-term and long-term investments to generate more revenues, as well as used various financial instruments for risk management, including reduction of finance cost;

5. The Company built a relationship with stakeholders through the social responsibility process and communicates to both internal and external persons for acknowledgement;

6. The Company maintained an efficient, transparent, and auditable management system subject to the good corporate governance principles, including the Quality Management System (ISO 9001), and developed the information system with updated technology to enhance performance

Company Sustainability Structure

2.2 Stakeholders' I MVO IVO MG

Stakeholders' Involvement

..... (102-40, 102-42, 102-43, 102-44)

CH. Karnchang prioritizes stakeholders from all sectors, as well prioritizing listening to feedback from all groups of stakeholders equally. It has therefore identified stakeholders in groups by using the Company's evaluation process, whether legal rights under related laws or agreements which have been made jointly or protection under basic rights. The Company realizes that the relationship and cooperation with the stakeholders shall be a factor contributing to the sustainable growth of CH. Karnchang. From deliberation, it has been identified that the stakeholders consist of 8 groups which are Shareholders, Investors, Analysts and Financial Institutions, employees, customers, trade partners, press, public, communities, and competitors. About this Root of the second second

About this report

..... (102-50,102-51,102-52,102-54)

In 2021

CH. Karnchang Public Company Limited prepared a sustainability report for the 9th consecutive year to demonstrate its intentions in management, policies, directions, as well as the direction of sustainable development. It also served to demonstrate its commitment to disclosure of important information regarding the Company's sustainable development in terms of economic, social, and environmental issues in order to communicate with the stakeholders for their acknowledgement, which covers the performance results from January 1st – December 31st, 2021. CH. Karnchang's report has been prepared in accordance with the reporting framework of the Global Reporting Initiative Standards or GRI Standards and the guidelines from (Construction & Materials disclosure) by disclosing information at the indicator level Core option which is gathered by the working committee, risk committee or responsible person from various departments in order to achieve clear and precise information.

Moreover, the Company has integrated its operation to be consistent with the United Nations Sustainable Development Goals: SDGs) and to demonstrate its commitment in responding to the sustainability goals.

Reporting Boundary

The disclosure of information in this report has been considered according to business relevance, the readiness of the information, and the impact to the operations under the main business, that is construction, which covers only the businesses of CH. Karnchang Public Limited Company and V.R.T. (51) Co., Ltd., , the MRTA Orange line (East Section) between the Thailand Cultural Centre – Minburi. Project and King Chulalongkorn Hospital: Integrated Medical Center Building Project. In this regard, this report is yet to be able to disclose information from all construction projects. The reason being that some of the Company's projects were completed during 2019, while data collection is under development in order to report the results in accordance with the Company's standards. However, in order to ensure the completeness and clarity of the content, CH. Karnchang shall prepare a plan to improve the data gathering system for better efficiency which shall lead to quality performance reporting in according with the GRI standards.

Establishment process for content of the sustainability report

CH. Karnchang has a process to evaluate key issues by considering the GRI's content establishment, through engagement of the management and employees, as well as considering the expectations of key stakeholders in order for this report to respond to and communicate with both internal and external stakeholders of the organization, by using the following procedure:

Identifying the issues of significance (Identification)

In identifying sustainability issues, the working committee considers the sustainability issues from issues that are related to the construction business, expectations of the relevant stakeholders, and sustainability development goals according to the frame laid by the United Nations in order to cover all dimensions including economic, environmental, and social.

Ranking the significant issues (Prioritization)

The working committee processes and ranks the significant issues of CH. Karnchang through its operational meetings of the representatives from various relevant departments to review the significant sustainability issues by identifying the significance of each issue from 2 viewpoints, which are, the level of influence on the evaluation and decision of the stakeholders, and the level of significance of the impact on the economy, society, and environment, as well as identifying the scope of impacts which may occur from the mentioned significant issues of sustainability.

The validation of the significant issues (Validation)

The working committee has verified and presents the significant sustainability issues to the senior management for their consideration and approval in order to ensure that the mentioned issues are complete, comprehensive and accurate, and consistent with the expectations of the stakeholders both internal and external.

Reviewing the completed report (Review)

CH. Karnchang is committed to continuously improving its sustainability reports by giving the opportunity to all stakeholders to share their opinions regarding the sustainability report in order to enhance the report preparation process to be in line with the needs or the expectations of the stakeholders in the next version.

Good Corporate Governance

..... (103-1, 103-2, 103-3)

Implementation of the principles of good corporate governance is an important foundation for a business operation that is moving towards business stability and towards long-term organizational sustainability, as well as important issues which all groups of stakeholders are interested in and expect for the organization to carry out the tasks in this area. Therefore, CH. Karnchang and the Board of Directors recognize and place importance on Good Corporate Governance by incorporating good governance policies and management practices into the roles and responsibilities of the Board of Directors, as well as preparations of other policies and practices such as the preparation of an ethics manual, business ethics, and good practices to be a guideline for behavior towards the Company, colleagues, external parties, and society according to the principles of good ethics. Also, the establishment of management and control systems, an implementation authority-balancing control mechanism for the administration to be transparent and verifiable, maintaining the financial credibility and disclosure of information on the business operation with considerations regarding all groups of stakeholders and respecting the equal rights of the shareholders, including the operating standards in accordance with the regulations of the Stock Exchange of Thailand.

(For more information please visit: http://www.ch-karnchang. co.th/#/governance)

In order to communicate and promote compliance with ethics in business operations of CH. Karnchang, the human resource department has prepared a written paper on ethics in business operation as mentioned earlier which is given to operating employees. The human resource department has always organized training in compliance with business operation of the company for everyone. In 2021, thirteen training sessions were organized and twenty new employees receiving the training.

In addition, executives and employees are given evaluations on their compliance with ethics in the business operation of the company. In 2021, there were 94 executives (starting from the level of section manager up to chief executive officer) who did the evaluation, and all 94 evaluations were returned to the human resource department, which accounted for 100 percent, and the overall evaluation result fell under the "excellent" criterion. For employees (starting from the level of department manager up to operating officer), there were 1,278 employees who did the evaluation, and all 1,278 evaluations were returned, accounting for 100 percent. The overall evaluation result falls under the "excellent" criterion.

However, in order for the operation on Good Corporate Governance to be more efficient and tangible, CH. Karnchang has designated the Executives to have a role in reviewing issues and risks on corruption prior to presenting to the Corporate Governance and Risk Management committee for approval quarterly. Moreover, the policies are being reviewed at least once every year for their suitability by the Board of Directors under the Company's management structure, which consists of 5 sub-committees following the Company's management structure (102.18) as follows:

Economic operations

Company Sustainability Structure

As at December 31, 2021

1

Roles and duties of the Committees

By which, CH. Karnchang has established the operational roles and duties of each Committee within the Board of Director's structure of CH. Karnchang Pubic Company Limited as follows:

Executive Committee 6 members

Corporate Governance and Risk Management Committee 4 members

To provide advice and monitor the operations to ensure compliance with the principles of good corporate governance. Oversee and review the Company's overall risk management, as well as strategies that are used in managing the risks.

Social and Environmental Responsibility Committee 3 members

Supervise the Company's operation regarding its social and environment responsibilities by focusing on the impact on the Shareholders and the stakeholders through the establishment of the roles and responsibilities of the Social and Environmental Responsibility Committee as follows:

- Establish the Company's social and environmental guidelines and policies in order to present them to the Board of Directors.
- Review and approve the Company's strategy to achieve the goals and policies regarding CSR
- Review the annual plan and budget for the operations regarding CSR in order to present them to the Executive committee and the Board of Directors.
- Review and follow up on the progress of CSR operations, as well as evaluate the success and the quality of the CSR projects.
- Other duties as assigned by the company

Moreover, in order to create confidence among all stakeholder groups, CH. Karnchang therefore has a way to continually improve the Company's good corporate governance practices through reviewing its policies on corporate governance and compliance with such policies at least once a year. In 2021, the Social and Environmental Responsibility Committee held meetings to follow up on the progress of the Company's actions regarding social and environmental issues a total of 2 times. Additionally, CH. Karnchang has formulated other operational policies which are under the principles of good corporate governance, such as non-discrimination, anti-unfair competition, non-violation of intellectual properties or copyrights, with details as follows:

Anti-Unfair Competition Policy (Antitrust / Anti-Competitive Practices)

CH. Karnchang believes that business competitors are the important driving force that allows the company to develop and improve operationally to achieve higher efficiency at all times. Therefore, CH. Karnchang places importance in compliance with the various regulations under free trade laws such as refraining from destroying the competitors' reputation by making negative accusations that are not based on the truth, refraining from accessing the competitors' confidential information dishonestly or by other inappropriate methods which affect the overall business development, including service standards, technology development, and new innovations which bring maximum benefits to society and the country's economy steadily and sustainably in the long run.

Non-Discrimination Policy

CH. Karnchang has established policies and practices based on equality and human rights principles towards all groups of stakeholders, such as opportunities for career advancement, reasonable welfare and compensation based on the nature of the job, as well as arranging operational areas with a safe and pleasant environment for all employees equally. Also, disclosure of business information that is complete, accurate, transparent, fair and verifiable, including granting rights for all major and minor shareholders to attend the annual general meeting without discrimination. Additionally, having a procurement management system, preparation of contracts, and debt settlement that are transparent and fair in order to retain a good relationship between CH. Karnchang and its trade partners, creditors, and debtors equally.

Policies and guidelines on non-violation of intellectual property or copyrights

The Board of Directors of CH. Karnchang has established policies and practices regarding non-violation of intellectual property or copyrights by prohibiting the Executives and employees from installing illegal software and make copies of copyrighted software for personal or professional use without permission from the developers of such software to prevent issues which may cause damage to the Company or its reputation.

Anti-Corruption (102-13, 103-1,103-2, 103-3, 205-1)

As CH. Karnchang is a construction company for large construction projects with high investment value and related to the development of the basic infrastructure system of our country, this is an issue which the Thai Construction Industry Association (TAC) attaches great importance to because the Thai Construction Industry Association under Royal patronage has signed a cooperation agreement with the Anti-Corruption Organization of Thailand to prevent and suppress corruption, and has participated in the Private sector's (Collective Action Coalition Against Corruption: CAC) to promote cooperation in the prevention and suppression of corruption according to the national strategy on prevention and suppression of corruption and to strengthen inter-organizational cooperation in supporting various measures to prevent fraud and corruption.

For this reason, CH. Karnchang therefore places great importance on anti-corruption and illegal practices whereby all its business procedures must be based on transparent actions and strictly abide by the relevant laws in order to create confidence for all stakeholders, and to create confidence at the international level. CH. Karnchang has established policies on anti-corruption by incorporating issues on fraud and corruption as part of its organizational risk management, especially risks of corruption caused by employees failing to fulfill their duties with integrity and perform acts which are in violation of the rules or laws both internally and externally, as well as establishing additional operational policies as follows:

• Requirement for the Company's personnel at all levels, including companies within the group, including staff, representatives, affiliated companies, or any individual who acts for or on behalf of a juristic person, whether or not they are authorized in such matter, shall strictly adhere to the policies on prevention and anti-corruption, bribery, and business ethics.

 Practice guidelines in regards to conflict of interest by prioritizing the Company's interests under the law and ethics, with fairness and transparency.

 Practice guidelines in securities trading and usage of internal information by not exposing internal information related to the operation or business management, by which a person acquiring such information through performing their duties, uses such information for their own personal or for other personal gains wrongfully.

 Procurement practice guidelines shall follow the regulations or procedures specified in the procurement regulations, consistent with the operating authority, and fair to all related parties.

· Practice guidelines towards government agencies shall strictly comply with the relevant laws and regulations.

 Practice guidelines in accepting or giving gifts, assets, entertainment, facilitation fees, or any other benefits which may influence a decision.

- Practice guidelines in charity donations and political activities support.

In order for the implementations on anti-corruption to achieve maximum effectiveness, CH. Karnchang supports and promotes all levels of personnel. This includes employee, representative, subsidiary, or any person who acts for or on behalf of a juristic person, no matter whether the person has authority or not, to be conscious of anti-corruption and fraud in all forms through the communication of anti-corruption policies and bribery, by which all employees shall receive a copy of the policies in writing. In addition to having clear policy formulation, CH. Karnchang also includes issues regarding corruption to be part of the risk of CH. Karnchang. The management department also has the duty to review the issue prior to presenting it to the corporate governance and risk management committee for approval in every quarter, as well as arranging training sessions for the Executives and employees in order to create awareness and understanding as a part of the orientation process or prior to new employees assuming their positions, with details as follows:

Furthermore, CH. Karnchang makes certain that actions are taken according to the policy and there is a review of the appropriateness of the policy by the company's board of directors at least once a year. Policies on corruption prevention and anti-corruption, as well as giving and accepting bribes are communicated in writing to inform the employees with details as follows:

Total number of recipients of the Organizational anti-corruption policies and practice guidelines

Total number of business trade partners who received communication in regards to the organizational policies and guidelines on anti-corruption.

Remark : The Employee level and the type of trade partnership can be divided in accordance with the organizational structure.

The human resource department organizes training for employees every year in order to provide education regarding policies and procedures on anti-corruption. In 2021, there were two training courses on anti-corruption with details as follows:

Remarks: The employee level can be divided according to the organizational structure

Issues on anti-corruption and corruption are issues in which CH. Karnchang, a construction contractor, and a member of Thai Contractors Association, gives high priority. Therefore, in July 2017, the Anti-corruption Organization of Thailand, and Thai Contractors Association under H.M. the King's Patronage, have signed an MOU in preventing and suppressing corruption problems, in order to promote cooperation in the prevention and suppression of corruption according to the National Strategy on Prevention and Suppression of Corruption. In addition, the company's board of directors has also assigned a follow-up management department to participate in the study of the procedural guidelines in signing the Letter of Intent for not engaging in corruption by participating in the Thai Private Sector Collective Action Against Corruptions with Thai Contractors Association and companies in the construction business group, for appropriateness in participating in the signing of the Letter of Intent of the Thai Private Sector Collective Action Project together in the signing of the Letter of Intent of the Thai Private Sector Collective Action Project together in the signing of the Letter of Intent of the Thai Private Sector Collective Action Project together in the signing of the Letter of Intent of the Thai Private Sector Collective Action Project together in the signing of the Letter of Intent of the Thai Private Sector Collective Action Project together in the future.

Channels for receiving complaints on anti-corruption

..... (103-2, 205-3)

In this regards, CH. Karnchang has established channels for reporting tips and complaints, including protection measures for the informants who witnessed the acts of fraudulence and corruption, according to the principles of good corporate governance regarding roles towards the stakeholders by establishing a reviewing process and protection and mitigation measures for the informants or the complainant, following the policies on whistleblowing and complaints regarding corruption as specified by the company as follows:

In 2021, there were no complaints against directors, executives, and employees of CH. Karnchang for using internal information for personal interests or for violating rules and regulations in working, as well as there were no cases for not in compliance with the laws, both in terms of economic and social aspects. In addition, it did not appear or there were no complaints that personnel of CH. Karnchang violated or acted in violation of ethics in the business operation of the company or there were no corruption, giving or accepting bribes or acts in opposition of unfair competition, or violating rules and regulations in working.

In this regard, from the risk evaluation on corruption of 2021, CH. Karnchang did not come across any risks or complaints regarding corruption, and there were no incidents where an employee was discharged or disciplined due to corruption. There were no findings that the Company entered into an agreement with trade partners or business partners who were engaged in a violation or breach of contracts that are related to corruption. Additionally, no organizations or employees sued the Company for a case of fraudulent actions, and all the aforementioned cases are in line with the Company's objectives which anticipate that the Company's operations are carried out with integrity, free of fraudulence and corruption.

Risk and Crisis Management

..... (103-1, 103-2)

The rapid changes in today's world generate various factors of risks such as changes in technology, competition that is more intense both from competitors in the same business and multi-national businesses that have entered the market, political instability which effects the business operation both directly and indirectly, resulting in risk management becoming an important tool in operating the business in order to achieve the objectives and also an important factor for good corporate governance. In order for the organization to achieve its objectives in terms of economic and relationship-building, as well as responding to the expectations of the stakeholders, therefore, CH. Karnchang has conducted a review on the procedures and the strategy of its current business operation to ensure its readiness in coping with the mentioned changes, by considering the present situations and evaluating the possibility of risks that may occur in the future and new risks as follows:

Organizational risk management

Risk issues on Sustainability	The Importance of the risks	Performance
 Risks from the evolution of technology Risks from losing competitive ability to foreign competitors 	 Risks from the evolution of technology are significant to the increase of competitive abilities in business. Nowadays, foreign competitors have new technological capabilities and financial capital advantages. 	 Appointing a team with specific knowledge and skills in order to monitor, analyze, and evaluate the significant impacts that the changes have on the business, and report to the senior executives in order to formulate measures to face these changes in a timely manner. Gather the various insights from the construction, challenges, and problem-solving methods from the previously completed projects into a knowledge depository in the form of a library for the relevant parties to study, and organize a training session for the employees' acknowledgement. Adjustment of the business strategy in order to retain the competitive edge in terms of cost, technology, and innovation to maintain the Company's sustainable business growth. Co-invest with foreign businesses in order to study, develop, and apply new technologies to existing ones that are being used at present, as well as improving the organizational efficiency. Creating new investment opportunities through the application of new technologies. The improvement and development of the potential of the organization

Furthermore, CH. Karnchang has appointed its Good Governance and Risk Committee to perform duties in formulating policies, risk management operational framework, providing advice to the Board of Directors, and management in regards to risk management, supervision and support for risk management to be successful, determining the company's key risks that are consistent with the Company's business both from internal and external factors that may affect the business operation and organizational objectives such as investment, financial, security, law and regulations.

Including making suggestions on methods of protection, methods to reduce the risks to be within the acceptable level, monitoring and evaluating the results, improving the operational plan for continual and appropriate risks reduction, along with reporting the results of risk assessment and actions taken to reduce the risks to the Board of Directors on a regular basis. The Board of Directors must receive a timely report in the event that there are issues which significantly affect the company in order to prepare a business continuity plan (BCP) to withstand the various incidents that may cause operational disruption to the organization and enable the company to resume normal operation within the appropriate time, by which the aforementioned execution shall be specified under risk management structure as follows:

Risk Management Structure of CH. Karnchang Public Company Limited

In addition, CH. Karnchang has established risk evaluation guidelines for the business through establishing a risk management system and prevention measures that are effective in covering the entire organization as follows :

• The Board of Directors, Executives, all employees, and every department are the owners of the risks, and are responsible for evaluating, monitoring, and supporting the existence of effective risk management procedures.

• All departments of the company must implement a process to administrate and manage risks, as well as continuously and systematically evaluate, monitor, and fine tune the process to be suitable with the changes in the business on a regular basis at a minimum of once a year.

• Include risk assessment as part of the annual operation plan for every department by identifying all risks covering the entire organization by taking into consideration the risk factors both from within the organization and from outside, as well as implementing appropriate risk management measures.

• The Governance and Risk Management Committee has a duty to assess the risk management and present their opinions to the Board of Directors.

• Create a corporate culture which generates a mutual understanding and awareness of risks, build a knowledge base where the employees at all level are able to search for information and exchange experiences, which shall lead to the development and improvement in the process of risk management to become an efficient mechanism in strategic management, as well as preparation of a Business Continuity Plan (BCP) to be used in responding and operations in the event of emergencies to enable the key operations of the Company to continue smoothly and be able to resume normal operations within a reasonable period of time, under an emergency management project and process as follows:

Structure of the Continuity Management Committee and Communication Plans

(President)

Chief of the Continuity Management Committee

Supply Chain Management

..... (102-9, 103-1, 103-2)

CH. Karnchang places importance on the management of the supply chain on the basis of good corporate governance principles, especially in regards to Antitrust in the procurement process, for example procurement of materials and mechanical tools used in construction, hiring of subcontractors to work on the construction projects, by which all trade partners entering into the goods and services procurement process, CH. Karnchang has established a selection process for potential contractors based on competition on quality, product prices, experience, performance, appropriate qualifications, including after sales service and dealer's experience, whereby CH. Karnchang shall inspect the prices and the quality of the delivery to be in accordance with the standards specified by the owners of the project in order to minimize the impact on the entire operation system.

and the second second

Furthermore, CH. Karnchang has guidelines to increase the potential and improve the procurement process of goods and services by applying an Enterprise Resource Planning (ERP) system in the controlling and recording of purchasing order processing and inventory management to be more systematic, which results in CH. Karnchang's ability to effectively manage the inventory and reduce waste materials in construction projects, In addition, CH. Karnchang has also installed the SAP Ariba Solutions to help increase the company's procurement process and greator cost control capabilities to help more effective, as well as placing importance on the selection of building materials which have an impact on the environment, such as avoiding using materials made from asbestos and opting to use substitution materials which don't have an effect on the environment, by which the procurement work stream shall cooperate with the Professional Engineers in planning to procure the correct materials according to the project specifications.

In this regard, CH. Karnchang has established measures in the assessment of its trade partners in the selection process of choosing a supplier who shall become the company's trade partner, whereby the Procurement work stream shall implement measures to control, inspect, and evaluate such trade partners within a specific time frame, which the assessment shall be carried out a minimum of 2 times per year. CH. Karnchang has established measures in trade partner assessment whereby the procurement work stream shall implement measures to control, inspect, and evaluate trade partners on a regular basis, with the scope of evaluation, such as quality of products/service, the delivery, coordination/cooperation including manpower and machinery, by which the number of trade partners to be evaluated shall depend on the number of trade partners that meet the criteria for the evaluation at that time. In principle, the main suppliers and contractors shall be evaluated and for the small trade partners, it shall depend on the volume and the value of the orders at that time. In the event that the trade partner evaluation results do not meet the specified criteria, the Company shall invite the trade partners to jointly discuss the problems in order to find solutions and appropriate methods of improvement. Moreover, regarding trade partners who have been assessed and listed under the procurement management system, if the partner encounters problems or fails to meet the assessment criteria, CH. Karnchang shall invite such partner for a meeting to discuss, notify problems, and find a solution together.

Description of Procurement of Raw Materials

The Company procures raw materials from local and overseas sources as described above. The guidelines for procurement are as per the detailed procurement flow chart as follows :

PROJECT ENDS

Economic Performance

..... (102-7, 103-1, 103-2, 103-3, 201-1, 201-3)

The construction business and investments in basic infrastructure projects are the key components in the development of a country's economy and increasing the quality of life for the public. CH. Karnchang therefore is committed to operating its business under policies which take the stakeholders of all sectors into consideration, which includes stakeholders in terms of economic, social, and environmental issues, in order to achieve a strong performance, create sustainable returns for the shareholders, create jobs and distributing income to the industries within the supply chain, sharing benefits with the government in terms of taxes and promoting social activities that are beneficial to communities and society through the use of crafts and engineering potential in the creation of businesses, capital support, and various operational measures.

CH. Karnchang has a strategy in the management of the company's construction projects by managing the construction projects based on the principles of effective cost management, punctual work delivery to the clients (project owners), selecting construction projects that are beneficial to society and the country, which offer fair business returns, as well as creating synergies in the construction business and investments in basic infrastructures that are beneficial to the country's development in order to manage risks and increase long-term returns to the shareholders from a stable and sustainable income structures.

During 2021, the Company signed 7 new projects at a total value of 51,755 million Baht, which resulted in the accrued income pending recognition by the end of 2021 from the projects on hand being 48,819 million Baht, which was in accordance with the Company's strategy to select construction projects that are beneficial to society and the Country with fair business returns.

Economic performance in 2021

CH. Karnchang's operating performance (201-1) (Unit: Million Baht)

Construction and other related services

Investments in Infrastructure Businesses

For 2021, the Company's revenue from the construction business and other related services was 14,419 million Baht and revenue from investments in basic infrastructure businesses was 2,308 million Baht, with a net profit of 906 million Baht. Return on assets percentage was 1.09% and the net debt debt-to-equity ratio was 1.39 Return on equity ratio was 3.46% from investment value, and earnings per share were 0.55 Baht. The total revenue earned by the Company was able to be distributed to the various groups of stakeholders as follows:

Information security and information system

..... (103-1, 103-2, 103-3)

The security of information and information systems are crucial to the management of business continuity in order to create trust, security, and stability of information and information systems, by which the information must be stable, secure, accurate, reliable, and able to protect and maintain the Company's confidential information and information systems, whether it is the Company's own information or information of other persons, in order to reduce the risks of information leakage and the risks of damaging the Company's reputation. For this reason, CH. Karnchang has established practices that are in accordance with the Confidentiality of Information policies with the details as follows:

• Defining the class of data confidentiality and the ways in which the Company's personnel must understand regarding the level of confidentiality in each class and practices to maintain such confidentiality. The Company's personnel must maintain confidentiality in the scope of their responsibilities, ensuring that such confidential information is not exposed to other parties, including other Company's personnel who are not involved.

• The Company must maintain and protect the clients' information, as well as their business information from the Company's personnel and irrelevant external parties, except if required by the law to disclose such information, or disclosure for litigation purposes, or the Board of Directors has approved the disclosure of internal information to be used in the operation and management of the business that is the Company's confidential information not yet disclosed to the public, which, if disclosed will affect the Company's personnel therefore must keep the Company's internal information confidential, and shall not disclose internal information which comes to their knowledge through performing their duties to other parties, or use such internal information for their own benefit or minimizing the benefit of the Company.

• The Company's personnel shall receive a notification and campaign to refrain from using internal information through the Company's communication channels, especially when there are important events such as the issuance of new shares, issuance of bonds, employment of personnel who used to be hired by competitors or the government. The Company must search and study the confidentiality agreements which the personnel have made with competitors or the government, and shall not take any actions which force the personnel to breach the contracts made with competitors or the government which may lead to prosecution.

• Disclosure of information shall be done by authorized personnel of the Company. Any person who does not have the authority to disclose information, if being asked for any information, such person shall advise the inquirer to make the inquiry with the person who is authorized to disclose information to ensure that the information provided is correct and answered in the same direction.

• Regarding the Company's personnel, the data should be kept at a minimum for 10 years by storing it as a paper document and as an electronic document in order to retrieve certain types of document, and store it as per the law's requirements. Once the storage period is due, such documents should be destroyed.

CH. Karnchang improved its Computer Network Security System (Firewall) in order to prevent any mentioned information leakage by adopting the Microsoft Office 365 system to apply in the maintenance and control of information, as well as preparation plans to improve the Computer Network Security System (Firewall) in 2 layers for high-sensitive data departments such as Human Resources and General Management by the year 2021. The effective implementation of information security and an information system resulted in no cases of complaints found in 2021 on these issues. (103-3)

Environmentfriendly business operation

5

Environment-friendly business operation

From the concerns regarding the current impacts on the environment causing many organizations to implement policies and various measures to control the operations with greater awareness on the responsibilities towards the environment, CH. Karnchang places great importance to developing the organization to become progressive and sustainable as the leader of the construction business and as an integrated investor in the country's integrated basic infrastructure.

CH. Karnchang is committed in socially and environmentally responsible operations, alongside efficient management. As one of the Company's main businesses is construction, therefore the Company has overseen the effects that may occur from the Company's operation, by implementing supervision in regards to atmospheric air quality, noise level, surface water quality, transportation management and waste management, under an operation called "Green Construction", or construction that is friendly to society and the environment, which is the management method in regards to the environment for all construction projects of CH. Karnchang.

Key Performance in 2021

24 Hours average dust volume standards values = 0.33 milligrams/cubic meter (mg/m³) Standards values for dust particles not exceeding 10 microns on average for 24 hours = 0.12 milligrams/cubic meter (mg/m³)

✓ In accordance with the specified standards

Maximum level of noise does not exceed 115 decibels (dBA) The average level of noise in 24 hours does not exceed 70 decibels A (dBA)

\checkmark In accordance with the specified standards

Amount of electricity power consumption

✓ 10,075,165.20 Mega joules (MJ)

Environmental management from construction operations

There is strict environmental management for all construction projects of CH. Karnchang, including within the construction areas, project office, and building material storage area, by which during all operational procedures, CH. Karnchang ensures strict compliance with construction-related laws in order to mitigate the impact on the environment as a result of construction activities in every project. Alongside this, CH. Karnchang initiates the application of modern technologies and techniques that meet the standards by utilizing a BIM system (Building Information Modeling) in the construction planning to achieve efficiency, which results in faster construction work, ability to control the quality of the construction, and control the usage of resources for maximum benefit, as well as contributing to better cost management.

In addition, CH. Karnchang adheres to the quality management system according to the international standards system in regards to the management system which contributes to the clients' satisfaction towards the product or service of an organization, or ISO 9001/2015 and other related requirements which are considered good practice that are accepted as international standards, as well as requiring the management of every project to prepare a management system and operational plan on occupational health, including a supervision plan to mitigate the impacts on the communities and the environment with a regular quality assurance system that is continuous and serious, in order to ensure safety and create confidence in the employees, public, and nearby communities, and ensure that the impacts are minimized by following the measures and management plan efficiently. CH. Karnchang has implemented environmental management from construction projects which cover the various topics as follows:

Management Guidelines

In large construction projects, the key impact from the operation is the air quality from dust issues in construction sites which is a direct responsibility of CH. Karnchang due to various building materials being used in construction which is the cause of dust diffusion during construction activities which may affect the workers and communities surrounding the construction area. It is necessary for CH. Karnchang to implement dust control measures under the conditions of construction work prescribed in the National Environmental Quality Promotion and Conservation Act B.E. 2535 and the Ordinance of Bangkok (Bangkok) and guidelines for dust control during construction by the Pollution Control Department that CH. Karnchang shall follow, together with the owners of the projects, and having government agencies such as the Pollution Control Department, the National Environment Board, etc., oversee and supervise the construction projects.

CH. Karnchang has established guidelines in managing dust issues during construction by identifying monitoring points to inspect air quality in the construction area, including a plan showing the project's (Boundary Line), operational plan, and process that are under the benchmarks specified by the government agencies. CH. Karnchang provides preventative measures within the project areas as follows:

CH. Karnchang has promoted and developed guidelines to control and protect the air quality from the diffusion of dust during the construction projects in order to keep the dust level within the benchmarks according to the announcement by the National Environment Board, which has been defined as follows:

• Total dust volume on average for 24 hours shall be less than 0.33 milligrams/cubic meter

• Dust particles not exceeding 10 microns, on average for 24 hours shall be less than 0.12 milligrams/cubic meter

In 2021, CH. Karnchang identified monitoring points to inspect the air quality in the Charnvit School area of the MRT Orange Line project (East Section) : The Thailand Cultural Center-Lam Sali-Min Buri and in the construction area of the Integrated Medical Center builing, King Chulalongkorn Hospital, by checking the average dust value during 24 hours and the average value of dust particles not exceeding 10 microns during 24 hours (the inspection was carried out between January – December 2021). It was found that the air quality index value was at a normal level. However, CH. Karnchang shall continue to maintain the standard of air quality control and protection measures from dust diffusion in future construction projects.

24 Hours average dust volume and average dust volume not exceeding 10 microns in 24 hours

The MRT Orange Line (East Section) : The Thailand Cultural Center-Lam Sali-Min Buri Project

*24-hour average dust volume standard value = 0.33 milligrams/cubic meter (mg/m³)

** Standard values for dust particles not exceeding 10 microns on average for 24 hours = 0.33 milligrams/cubic meter (mg/m³)

The Integrated Medical Center Builing, King Chulalongkorn Hospital Project

*24-hour average dust volume standard value = 0.33 milligrams/cubic meter (mg/m³)

** Standard values for dust particles not exceeding 10 microns on average for 24 hours = 0.33 milligrams/cubic meter (mg/m³)

*** In July 2021 ,no measurement because there is a project office and worker camp according to government policy.

NOISE QUALITY control

Noise quality is one of the effects which results from construction activities, which if the noise level exceeds the level specified by the standards, it could severely affect the lives of the people who are living around the construction area. For this reason, CH. Karnchang has established a management plan and various control measures as specified in the conditions of the construction work. The Company is responsible to adhere to the law together with the project owner under the supervision from various state agencies such as the National Environment Board or Municipal officers, for example.

Management Guidelines

..... (103-2)

CH. Karnchang has identified monitoring points to inspect the noise levels in construction project areas with a plan showing the project's Boundary Line to explore the environment, source of noise pollution, characteristics of the noise and the working hours, as well as preparing a plan and operational procedures to control the noise level to be within the level that is specified by the government agencies in order to promote and develop management guidelines to control and prevent noise pollution from construction sites from exceeding the standard benchmarks according to the announcement by the National Environment Board No. 15 (B.E. 2540) By specifying a standard for general noise level

In 2021, CH. Karnchang monitored and inspected the construction noise level at CH. Karnchang's various construction projects and found that it is within the benchmark index criteria as mentioned above and did not find any complaint cases regarding the level of noise exceeding the standards. Moreover, CH. Karnchang has established measures to reduce the impact from noise as follows:

- Establish measures to prevent effects from noise Such as installation of temporary noise canceling walls around the construction site.
- Conduct construction activities with loud noises between 6:00 am. – 10:00 pm.
 If the activities shall continue beyond the established time, it will be communicated to the surrounding communities for their awareness.

Maximum noise level not exceeding

The average level of noise over 24 hours not exceeding

 Areas to conduct soil stripping, demolishing, destruction, drilling machines Concrete mix, solid fence shall be built around the construction area (height not less than 2 meters)

Management Guidelines

Wastewater treatment and waste disposal

As CH. Karnchang is the country's major construction business operator which pays great attention to every process of the construction, including the quality of the construction as well as paying attention to the environment while the construction is in process in order to maximize the efficiency in reducing the impact caused by the construction activities, including the care and management of wastewater and waste which have been implemented in every project of CH. Karnchang, CH. Karnchang is in compliance with the National Environmental Promotion Act 1992 in carrying out the control and prevention of effects on health and safety of the communities and the environment both within the construction area and surrounding areas.

For 2021, there has been no data collection on the volume of wastewater at the office building and various construction projects of CH. Karnchang, since the construction projects do not release wastewater from the production process. Wastewater from the temporary sanitation system used during the construction period shall be treated at the prefabricated treatment tank prior to releasing to public water sources and the quality of the water shall be in accordance with the standards set by the law.

In regards to the garbage volume within the office building and CH. Karnchang's various construction sites, there is yet to be a collection of data, by which CH. Karnchang is in the process of developing data collection systems that are suitable to the type and nature of future construction projects.

Wastewater Treatment Management

Waste Disposal Management

CH. Karnchang shall review the scraps of construction materials, garbage, and waste which occur from the construction site which may affect the communities by separating the waste prior to forwarding it to the district office or other related agencies to collect and dispose of it according to the sanitation principles prescribed by the government agencies.

Energy is an important key factor in the development of a country's economy and society. At present, the demand for energy is continuously increasing, which has resulted in shortages of energy and fluctuations in the increasing cost of production. For this reason, CH. Karnchang attaches great importance to the conservation of energy and energy consumption by managing the energy usage for maximum efficiency.

Management Guidelines

CH. Karnchang adopts guidelines in the management of energy by supporting the government policies towards energy conservation and encouraging its employees to be aware and pay attention to conservative and efficient usage of energy in order to reduce the consumption and the burden on the Company's expenses on energy.

Starting from the management at the head office, such as turning off the lights in the operation area during lunch breaks or when not in use, supporting the replacement of fluorescent lamps with energy saving LED lamps, setting the time to shut down the air conditioning system before the completion of working hours, and controlling the temperature to be at an appropriate level, as well as starting to substitute electrical appliances in the office to be energy-saving types, for example.

Electricity consumption in 2021 (302-1) Amount of electricity consumption 10,075,165.20_{Mega joules (MJ)}

Remark : * Information on the electricity consumption of CH. Karnchang PCL Headquarter only

Comparison of the amount of electricity consumption from 2019-2021

- Kilowatt/hour (kWh)
- Mega joules (MJ)

Employees of CH. Karnchang

CH. Karnchang (PCL) is aware that for a business to have good success, this will require efficient management of company's resources. Every operating personnel is part of the company's resources, which the company has to take care of and manage to be in accordance with and supportive of strategies and goals of the business. Management of human resources is based on transparent, fair, equal employment, compensation and welfare, or other fair benefits, as well as importance will be given to the development of knowledge and capability in order to improve work skills and for these skills to be used for the development of the organization.

Policy and guidelines of CH. Karnchang on labor employment take into consideration the principles of basic human rights, corporate governance, and fair conduct, as well as in compliance with the steps of the Labor Protection Act and Labor Relations Act. Furthermore, they are also based on ethical law principles, without any discrimination regarding employment union/work condition, compensation payment, work promotion, or training and development of employees, and non-discrimination on ethnics, religion, gender, race, education institution, or disabilities. They will be considered based mainly on knowledge and capability of work responsibility. Wage rate will be managed appropriately according to the work position, experience, and capability of the employee. This will apply no matter whether the employee is a monthly employee or a daily employee. The goal is for the employees to be able to work happily with the company and reduce the employee turnover rate. In addition, CH. Karnchang's labor conduct is also in compliance with the labor law, and there is no employment of child labor according to the age criteria specified by the law, along with there being supervision of the sub-contractors' actions to not be in violation of human rights principles and labor laws.

The employees of CH. Karnchang are a factor of utmost importance for the successful operation of our business. It is necessary for CH. Karnchang to manage its human resources fairly and with consideration to the principles of human rights, which shall be consistent with and supportive of CH. Karnchang's strategy and objectives, which can be achieved by implementing operations that are clear, transparent, fair, and equal in every process of human resources, as well as to support and develop the knowledge, competence, and skills of the employees, employee care and retention, so that employees may remain with the organization as long as possible, including supporting fair compensation and welfare for all employees.

Key performance in 2021

Employment and Labor Law Practices

There are changes happening in our current society, including business models which may accordingly change. The important factor in bringing the Company towards change depends on the organization of human resources, which is a factor that CH. Karnchang attaches great importance to. The reason for this is because human resources are the force driving the Company towards successful achievement of its goals. CH. Karnchang begins from the selection and hiring of efficient personnel by adopting human rights principles, good corporate governance, and execution in fairness and in compliance with the process stated in the Labor Protection Act and Labor Relations Act to reassure that there are no actions of discrimination in regards to race, religion, gender, skin color, and regardless of educational institutions or difference in abilities. However, the factors taken into consideration shall cover the skills, knowledge, competencies, and experiences of the personnel at all level, by aiming for employees to be able to work with contentment and reduce the amount of employee turnover.

Management Guidelines

CH. Karnchang has standards and personnel selection systems that are transparent and fair, by starting from the selection planning and communication to create motivation for the target applicants and process to conduct a written examination, English abilities test, and job interviews. The selection criteria are based on the knowledge and skills of each person, the suitability to the position, disregarding their gender, race, religion, or difference in abilities.

Attraction and retention of employees and potential employees

Once the personnel are employed at CH. Karnchang, the Company shall begin the process of retaining valuable employees with the organization, particularly employees with potential, by which these employees are the main force in the growth development of the Company. Employee retention helps to reduce the cost of hiring new employees which contributes to the Company's sustainable growth. CH. Karnchang has implemented guidelines in attracting employees by establishing a Succession Plan, continuous development of knowledge, a reasonable compensation scheme, and attempts to create a good working atmosphere by establishing good communication within the organization through Microsoft Office 365 system.

Employee's potential assessment criteria, whereby CH. Karnchang shall assess the employee's KPI (Key Performance Indicator) and Competency in their position, by which all employees at every level of CH. Karnchang, accounting for 100%, shall be evaluated, in order to be selected as a group of employees with potential. In 2021, there were a total of 48 employees in this group, calculated into a percentage at 2.43% of the total employees with details as follows:

2021 (48 persons 2.43%)

34 Persons 1.72%

Personnel development policy

Personnel development is an important process of management, which will enable conduct of many activities to be efficient and can also assist in enhancing work potentials. Provision of knowledge and enhancement of work skills are important matters in carrying out work, and can affect career advancement by enabling the person to advance in the work position. Therefore, personnel development has many tools to assist in development, both in terms of training that will help personnel to work efficiently, as well as development of new knowledge at all times.

Training is also a process that can change behaviors systematically so as to gain knowledge and understanding that can lead to capability development creating future skills and expertise. There are many forms of personnel development within an organization. Each organization can choose the format according to its suitability. Many organizations are turning their attention to Virtual Meetings or Online Meetings in the New Normal Era because of the suitability to the current situation as it helps provide good solutions and enable the training system not to be unnecessarily interrupted and can be continued well. These are described as follows:

1. Virtual Meeting training is a live training through Microsoft Team which will help save costs.

2. E-Training will help save costs of the organization and enable the organization to communicate with trainees conveniently.

3. Orientation is an introduction for personnel or new employees to understand rules and regulations, and procedural guidelines of the organization, in order for the new personnel to learn about the history of the organization, different levels of executives, regulations that must be followed, as well as organization structure.

4. Training, such as lectures, discussion, case studies, is a process created for the personnel to learn and gain expertise with an emphasis on a specific issue and for the personnel to change behavior in the needed direction, help reduce waste of resources, reduce work absence and reduce work resignation, and help to prepare the workforce for the organization's expansion.

5. Brainstorming is to motivate employees to express comments fully in a given topic. It is an appropriate method to be used in resolving complex and difficult problems.

6. Seminar is another popular method at present. It is an exchange of ideas and provides a forum for questions and answers in order toresolve problems.

7. Self-studies training is a training which emphasizes employee's ability to study and form understanding on his/her own, such as audio tape. This method of training is necessary to be used as a complement to other types of training.

8. Workshop is a training format that promotes employee's ability to learn, both in terms of theory and practice, and is able to apply to real work situation. Knowledge gained from the lecturer will help enhance knowledge and understanding of the employee to be able to resolve work problems, determine work guidelines and improve work.

9. Job rotation is when an employee is changed from one work position to another in order for the said employee to be able to work in a higher position, gain more knowledge and skills, help to enhance his/her understanding and good relations with employees in other sections, and promote awareness for everyone to realize that all work positions are of equal importance.

10. Coaching emphasizes providing explanations of work details and does not necessarily have to be done at the workplace only – coaching may be done outside of the work area. The direct supervisor will be the one who conducts coaching for the employee.

11. On the job training (OJT) emphasizes training in actual work practice. OJT is taught by the head chief or assigned officer to follow up on the employee in order to provide explanations and advise about the work. This tool is beneficial if applied in complement with coaching.

12. Job enlargement emphasizes assigning a greater workload. The new workload assigned can have a similar work procedure to the original work or may be of a different type of work; however, it will not be work that is too complicated.

13. Work delegation emphasizes distributing to the subordinate work under the responsibility and authority of the Supervisor in making decisions within the specified scope to conduct on the Supervisor's behalf. The majority of the work delegated will be routine work.

14. Job rotation emphasizes having an employee rotate from one work to another in order to learn about that work in a specified time period. It is mostly used as a tool in developing the capability of the employee to have more well-rounded knowledge.

15. Consulting emphasizes providing advice and recommendations to the employee when they faced with problems from work under their responsibility. The Supervisor has the duty to provide guidelines and an approach so the employee will be able to resolve the problem.

16. Self-learning emphasizes practicing by oneself through different learning sources/channels such as reading or studying of the system from work instructions or internet researches.

17. Internal trainer emphasizes creating an employee who has the ability to transfer knowledge, loves to teach, and is knowledgeable on the lectured topic. The said employee can be assigned as an internal trainer and has the duty to conduct training for employees within the agencies and projects.

18. Site visits emphasize studying the system and procedure of other organizations as an example on the topic of the site visit. This is for the employee to recognize the concept and practice principles that are successful and which can be adapted for further application within the company.

19. Training with experts (Counterparts) emphasizes actual practice training with experts and experienced persons on that particular topic. Experts are invited to provide training to the employees.

All of these training methods are tools and guidelines for the development of employees of CH. Karnchang which will help employees gain knowledge and improve the ability to work efficiently, and also to prepare the employees to be ready for advancement towards being executives, who have to be ready as a good leader and have potentials appropriate to the executive position, especially for the development of change management, visionary strategy, and innovation. The purpose is to motivate personnel to always develop oneself at all times and to be able to apply knowledge from actual work conducted through practice and experience instilled within the person for work benefits, as well as having Key Performance Indicators used along with Competency factors in evaluating work for concrete results. The company also sets up a career path as it is a strategy to maintain employees and to provide incentives for employees to recognize advancement in the profession. A succession plan is carried out to find and select good and capable individuals who are appropriate for the position. The said selection is done within the organization, the consideration of which is based mainly on work performance and potential. This is conducted periodically in order to evaluate the situation and make predictions. Development of knowledge and capability, and skills required by the position is also carried out in order to prepare personnel for replacement at all times.

Training and education

..... (103-1)

Providing training and education to our employees is an activity which CH. Karnchang has always implemented in order to develop the competencies of our employees at every level to be able to carry out their duties efficiently and support the Company in dealing with the changes that have occurred. The focus is to increase the employees' (knowledge), create the right (understanding), raise their working (skills) and adjust their (attitude).

Management Guidelines

..... (103-2)

In regard to personnel training and development, the process begins from identifying training needs, creating and building a training course for the employees, including follow-up and training evaluation, whereby the mentioned process can be applied to the development of personnel through training for all positions and being consistent with the organizational goals, contributing to the Company achieving its goals with excellence. In 2021, the training courses were divided into different types as follows:

Remark : In 2021, CH. Karnchang (Lao) Company Limited no training courses are organized because the construction project is completed.

Average number of training hours per person per year in 2021

Average Training hours seperated by employee level (hours/person/year)

CH. Karnchang's aims for training and education is at 8 hours/person/year

The goal in providing training and education of CH. Karnchang is to emphasize human and work development so that employees can improve knowledge, skills, and attitudes and have higher potentials, and at the same time the organization can have better performance. That is, training will help improve the work system of the organization to be in the same direction, help increase capacity and develop potential of the personnel, along with enhancing for a greater work efficiency of the organization.

Benefits obtained by the company from developing potentials and promoting advancement of the employees

By providing development of personnel, both in terms of skills and work expertise, both the employee as well as the organization will benefit. Personnel will have more expertise in doing the work and there will be fewer mistakes, which will result in higher output, quality products, and better company performance, all of which lead to sustainable growth. These things will bring about love, loyalty, and the devotion of employees to the organization. Employees will work happily. This is one approach that will help the organization to develop and progress alongside growth and compete with other business proudly. When the company has personnel who are efficient or skilled in doing the work, the opportunity in career advancement will be greater respectively, which results in the company gaining benefits from the development of personnel as follows:

Help reduce the cost of organization, reduce work absence, and reduce turnover rate of skilled employees

Employees have love, loyalty, and devotion to the organization, as well as being more attentive to work, which will help the organization to achieve its goals

Personnel can develop his/her own capability in order to enhance work efficiency and achieve greater success

New body of knowledge is created within the organization which will benefit the work of the organization

The organization has clear work directions and objectives which can be reached easier

Measurement of benefits gained by employees from potential development and promotion of career advancement for the employee

Development of personnel in an agency for professional advancement is considered an important matter in which one's own profession should be developed coupled with enhancement of skills in order for employees to have education and understanding of different techniques, methods, and new knowledge that are required by work position of such profession. There should also be evaluation of employees by using evaluation methods to follow up on work efficiency after training in order to see how much the work method can be improved when skill development received from the training is applied. The emphasis will be on potential development and self-development to enhance potential as well as development of ability to work with others, in order to create work participation and the ability to co-exist with one another happily, along with having work efficiency that can achieve the set goal and development of general management skills. Knowledge, skills and ability in general management are to be developed in order to prepare the employees who will be advancing to the executive position or personnel in the management career path who will be advancing to become an executive of higher level, to have appropriate potential to assume the management position in the future.

Promotion of personnel in an agency for professional advancement is an important matter which will help the employee plan his/her career advancement and see that there is future in his/her own work. This can be achieved by setting clear work goals of each employee, connecting the goal of employees with the main goal of the organization, and developing oneself to have characteristics well suited to the current and future work position.

Employee Occupational Health and Safety

..... (103-1)

CH. Karnchang operates a business in large-scale construction of various types, where the Company mainly requires manpower in order to operate and have various machinery and technology as a support. For this reason, the Company is considerate of employees' occupational health and safety in essence by continually integrating good occupational health and safety management in order to reduce the and control employees' operational accidents. Additionally, it is also a response to the Company's quality policy regarding security management and it effectively enhances the quality of life of the personnel at work.

Security Policy

- Be responsible for safety and occupational health.
- 2 Employees and relevant parties of the project must be aware that safety is everyone's duty.
- 3 Safety and occupational health must be incorporated into various operational plans.
- **4** Risk assessment is established in all operations.
- 5 Promotes safety and occupational health by organizing training and education for all employees.
- 6 Constant improvement of the security policy to create confidence regarding safety and occupational health.

CH. Karnchang recognizes that construction work must be carried out alongside awareness of safety and occupational health, whereby the Company's security policy is one of the main policies implemented to ensure that the operations are safe and that they are carried out efficiently at every step, as well as to prevent and lessen the losses from accidents which may occur to the employees under the Occupational Safety, Health, and Environment of the Work Place Act.

Therefore, CH. Karnchang attaches great importance to our security policy, and regards the policy as the highest standard, by committing to conducting safe operations under the Occupational Safety and Health law of Thailand such as:

- Ministerial Regulations on the Prescribing of Standards for The Administration and Management of Safety, Occupational Health, and Environment in the Workplace for Construction Works B.E. 2551
- Occupational Safety, Health, and Environment Act B.E. 2554
- Ministerial Regulations on The Prescribing of Standards for The Administration and Management of Safety, Occupational Health, and Environment in the Workplace (Volume 2) B.E. 2553
- Ministerial Regulations Prescribing Standards for the Administration and Management of Occupational Safety, Health, and Environment in
- the Workplace for Works Involving Machines, Cranes, And Boilers, B.E. 2552
- Ministerial Regulations Prescribing the Administration and Management of Occupational Safety, Health, and Environment in the Workplace for Confined Space Workplaces, B.E. 2547

By which, the details have been included in the Occupational Health and Safety Management Plan of CH. Karnchang's employees to allow all employees to be aware of and pay attention to their health and safety at work. In addition, CH. Karnchang's contractors shall strictly comply with the regulations of the Safety and Occupational Health plan to ensure that the operations on safety are conducted efficiently. There shall be an appointment of Safety, Occupational Health, and Environment in the Workplace Committee for every construction project belonging to CH. Karnchang with an objective to determine the standards and establish policies for the operations to be carried out efficiently, in which a meeting is required to be held once every week to ensure safety, and also as a measure to control losses caused by accidents at work.

Security Committee on the Project site

Safety, Occupational Health, and Environment in the Workplace Committee shall consist of not less than 11 persons including

Chairman	Committee	Directors and Secretary
1 Person	5 Persons: appointed as	1 Person
Authorized by the employer,	the management representative	Professional Security Officer
which is the Project Manager	committee	
	6 Persons: qualified as the	
	practitioner level representative	
	committee	

Besides the appointment of and the Safety, Occupational Health, and Environment committee, CH. Karnchang has guidelines to manage Occupational Health and Safety in accordance with the law and international standards based on the principles of prevention and control to avoid accidents that may occur from unsafe operations such as inappropriate selection of machinery or not wearing protective equipment as per the regulations, for example.

In this regard, the implementation of Occupational Health and Safety at CH. Karnchang is done in accordance with the Company's quality policy, ISO 9001:2015 standards, and consistent with general international practices in order for continual development, by supporting the budget and resources such as providing sufficient protective equipment, as well as organizing training to increase their skills, knowledge, and competence regarding Occupational Health & Safety, and continually strengthen the awareness of the Company's employees and relevant parties.

Injury ratio (IR), from the operations of all projects from 2019-2021

CH. Karnchang has continuous and systematic guidelines in the development of work management, starting from the planning process of safety management, putting the plans into action, inspection and improvement in order to elevate the objectives and increase the efficiency of safety management according to the format of a continuous development cycle.

COVID-19 Coronavirus Disease 2019

Moreover, during 2020 and 2021, there were problems due to the ongoing epidemic of Coronavirus Disease 2019 (COVID-19), the Company therefore prepared to accommodate any future various disease outbreaks which would have a severe impact on society and the Company's operations. Despite the fact that the Company currently formulated a risk management plan and a Business Continuity Plan (BCP) under which the Company was affected by the COVID-19 to a minimum, with the construction work having no any effect on the Company's finance, the impact from the COVID-19 on the Company occurred indirectly, resulting from the Company Group in which the Company has invested, for instance, Bangkok Expressway and Metro Public Company Limited (BEM), with the number of its service users reducing but only for a short period of time. Nevertheless, after the government sector's relaxation of various measures, BEM was able to carry out its operations in a new normal, thereby causing the MRT or expressway users to return to use the services as usual, etc.

The impacts from the situation of the COVID-19 outbreaks could be summarized as follows:

Impact on business operations

X None

and profit

Having no impact on revenue from construction

 Having indirect impact due to share of profit from associated companies invested by the Company

impacts on future business operations and bid plan

Having no impact on future projects

- Formulating the risk management plan and the Business Continuity Plan (BCP) to prevent and minimize impacts on business operations in respect of the construction projects and the Head Office
- Monitoring to ensure heightened safety and hygiene for personnel resources
- Ensuring revenue disbursement as planned
- Investing in infrastructure concession companies with the least impact when compared to other business
- Closely following up, assessing impacts on companies invested by the Company
- · Conducting cash management and financial planning with due care
- Planning to bid for the country's major infrastructure projects which provided the main mechanism in helping the economic recovery
- . Ensuring that bid opening plans were gradually launched as planned
- Being ready to keep on supporting various government projects which would
- revive the economy to become the New Normal

However, the COVID-19 outbreaks became a major concern which the Company had closely monitored. The Company had no worries if such problem would occur again in the future because the Company had appropriate risk management and efficient measures to cope with such occurred problems. Thus, the Company expected not to be significantly impacted by the future situation of the COVID-19 outbreaks.

Employee promotion and preparation for Retirement

Employees are the most important driving force of business growth and keeping up with the changing global society. Therefore, CH. Karnchang is focused on developing the Company's personnel in order to enable them to fully utilize their potential by giving equal development opportunities to all personnel at every level from the first day until their retirement day, whereby CH. Karnchang has arranged a skills management plan and lifelong learning that facilitates continuous employment and assists our employees with managing their lives after retirement.

CH. Karnchang has established both internal and external training plans for our employees by assessing whether the organized training courses can be beneficial to our employees themselves and the duties that they perform within the Company, as well as developing their working skills to increase their effectiveness, such as:

- Construction Cost Management by using Earned Value Analysis method
- Project Management Innovation by using Critical Path Method (CPM)
- Quality Control of Construction Projects
- Guildlines for the prevention of corruption in the organization.
- Knowledge of Construction Laws.
- Adaption of an accountant in the digital age to deliver analytical reports.
- Tax Planning : Corporate Income Tax and VAT to help reduce the corporate tax burden.
- Using the right to leave without pay for further education and
- being able to return to work as usual.

Moreover, CH. Karnchang has guidelines for life management after retirement, which includes social security planning, retirement savings, money saving and spending after retirement, and providing knowledge with regards to provident funds, which is another option to help save money for retirement and the funds can continue to grow even after retirement, by inviting guest speakers to share various knowledge that is beneficial to the employees in the future. The company has set up a provident fund, a long-term compensation when employment by the company is terminated or in case of retirement, in which executives pay into accumulated fund in the ratio of 10–15 percent of the salary according to the work period and the company will contribute the same rate to the fund. However, the maximum contribution by the company shall not exceed 10 percent of the wage. In 2021, the company contributed to the provident fund for 18 executives in the amount of 10,345,920 baht., in order for the employees to have saving prepared in the event of retirement, resignation, disability or as insurance for their families.

Community Engagement and Development

CH. Karnchang's aspiration is that business operations must go hand in hand with community development and environmental care by avoiding actions that will cause negative impacts to the community, as well as caring for all personnel, as a fair reward to the stakeholders both inside and outside of the organization and as a means to create mutual sustainability.

Key performance in 2021

CH. Karnchang operations, no legal dispute

Mitigation of impacts on communities

Communities are considered one of the stakeholders that CH. Karnchang places great importance on, on the grounds that during a construction period, the communities may be affected both directly and indirectly in regards to social and environmental issues. Therefore, the Company has an assessment and planning process to prevent impacts that may occur to the communities during construction activities, promotes involvement with the communities, and ensures that the needs of the communities surrounding the construction area are being conformed to, in order for the Company to gain acceptance and trust from the communities surrounding the construction area.

In the construction process, CH. Karnchang follows the control measures prescribed in the construction conditions, by which the Company has a responsibility to adhere to the law together with the project owner and committees from the community under the supervision of various government agencies such as the National Environment Board, officials from local agencies, etc.

Management Guidelines

..... (103-2)

CH. Karnchang has initiated community information studies (Social Mapping), data collection from stakeholders, appointed a community committee which consists of representatives from the government, project owner, community, and representatives from the Company to participate in discussions (Engagement) and identify the main operation plan (Master Plan), monitoring points and objectives, as well as assessment on the impacts (Impact Assessment), and stakeholder satisfaction survey.

Each of CH. Karnchang's project offices will be responsible for establishing measures and taking actions in mitigating any negative impacts that are significant to the community by allocating personnel to conduct community relationship activities and community engagement, including an arrangement of publicity signage and publishing the construction project details on the website for the public's acknowledgement regarding the project's construction plans, subcontractors' details, number of workers, construction plan and traffic management plan, as well as a construction site warning sign around the nearby areas of the construction site.

Additionally, a communication channel to report complaints shall be established in public relations media via social media, the areas where the construction activities are ongoing by publicizing through the project signage along the construction area and public relatios media via social media, specifying the name of the project's safety officer on site, including the contact number for reporting complaints, along with cooperation with the complainants to assess the impact and rectify the problems according to the Company's quality

Public Relations sing of the project, Complaint and Suggestion Box / Nameplate and Coordinator Phone.

Traffic management in the project area

To manage, alleviate, and reduce traffic problems for the residents in the area, CH. Karnchang has implemented a transportation operation plan to search for measures to reduce traffic impacts from construction by referring to various methods, including:

- Identifying areas for monitoring.
- Creating traffic plans that are consistent with the construction phase at various times.
- Meeting to discuss traffic management methods with local police officers and
- other relevant local officers.
- Assigning safety officers to participate in supervision with government officers.
- Preparation of accident statistics and causes of traffic accidents on the routes of users and pedestrians.

CH. Karnchang has managed and amended the traffic management around the construction area throughout the project operation period and found that major causes of traffic accidents are unrelated to the construction, such as violation of fire signals / traffic signs, driving in close proximity (rear end crash), scraping, sudden lane changes, etc. Therefore, the ways to correctly manage traffic and prevent accidents is to increase the number of safety officers on duty to help supervise during rush hour in order to control the speed and traffic lanes, as well as increase lighting during the night hours, for example.

Pericdic traffic management plan during the constrution of the MRT Orange Line Station Project

CH. Karnchang recognizes the importance of business operations that are consistent with ethics, law, rules, regulations, and various operational standards whether it is the labor law, international trade law, human rights law, laws regarding infrastructure systems and tax laws, etc, in order to prevent the effects that may occur to the operation of the business, such as reputation damage, payment of fines, or being suspended from operations that are not in legal compliance.

Management Guidelines

Every Executive and employees of CH. Karnchang has the responsibility to support, promote, and carry out their operations consistent with good practices in compliance with the economic and social law, with details as follows:

1. The Company's personnel shall have a thorough understanding of the laws that are directly related to their duties and responsibilities and to follow them strictly. Advice from the legal department shall be requested if there are any doubts, and no operations shall be carried out if such doubt persists.

2. In the event that the Company's personnel must travel to fulfill their duties abroad, that person must study the law, customs, traditions and cultures of the destination country prior to making the trip in order to ensure that the products or materials and equipment, including travel documents, travel purpose, and the operation at the destination country are not illegal, nor against the customs, traditions, and culture of the destination country.

3. The Company has compiled the laws and official regulations into categories for the Company's personnel to appropriately study the relevant laws and arranged to have orientations and educational training regarding the laws that are related to the business operation for the Board of Directors, Executive committees, and employees of the Company.

4. The Company must strictly adhere to the principles of international human rights, enhance the knowledge and understanding on the principles of international human rights for the employees to adopt as part of their operation, and shall not support any business that violates the principles of international human rights.

As of December 31st, 2021, the Company or the subsidiaries do not have a legal dispute in which the Company or the subsidiary is a party or a counterparty, that may have a negative impact on the assets of the Company or subsidiaries which are higher than 5% of the shareholders' equity at the latest fiscal year end. Including no lawsuits that significantly affect the Company's business operations and the Company does not have any lawsuit that does not arise from the Company's usual business operation in any significant way.

Furthermore, the Company's Board of Directors attaches great importance to the internal control system of the Company continuously, in order to prevent and reduce risks that may arise from corruption during one's duties, or non-adherence with the laws on economic and social issues, as well as the various regulations that are related to the Company's business operation. The Company has assigned the Audit Committee, which consists of independent directors, to review and evaluate the internal control system with the internal audit department reporting directly to the committee, to perform duties of reviewing the operation systems of each department of the Company according to the annual audit plan, which has been approved by the Audit Committee. The aim is to ensure that the Company adheres to all laws related to the business operation in all sectors, the operations are effective and efficient where the Company's resources are being maximized in value and benefit, as well as having control of the preparation of financial reports that are accurate, reliable, and delivered in a timely manner with compliance to the policies, legal regulations, and rules of the government and related agencies. Moreover, the effectiveness of the internal control system is reviewed continually to ensure that the business operation creates maximum benefit to the shareholders based on fairness to the interests of all stakeholders.

Additionally, the Audit Committee is responsible for engaging in considerate selection and nomination of an auditor, as well as his/her compensation and review of the disclosure of the Company's information to ensure the accuracy and completeness in the event that there are connected transactions or transactions that may cause a conflict of interests in order for the internal audit and the supervision of the Company's operation to be carried out efficiently. The Company therefore has appointed Mr. Viboon Angkapipatanachai, Executive Vice President of the Internal Audit Office, as the Chief of Internal Audits, who the Audit Committee is of opinion that Mr. Viboon Angkapipatanachai has the knowledge, ability, and work experience suitably qualified to perform the duty as the Company's Chief of Internal Audits effectively. In the appointment, removal and transfer of the person holding the position of Chief Internal Audit must be approved by the Audit Committee, and Mrs. Tipwaree Attakrit, Legal/Regulatory Manager, has been appointed as the Company's Operational Supervisor to be responsible in overseeing together with the President's Office by coordinating with the Corporate Secretary.

In this regard, in 2021, the Company's Board of Directors, Audit Committee, and Auditor established consensus that the Company's operation was in accordance with the principles of good corporate governance with compliance to the law regarding both economic and social regulations by the government and relevant agencies correctly and completely, and the Company's business operation is transparent and verifiable with appropriate and efficient internal control systems and risk management which can protect the Company's assets from being misused or used without authority by the Executives or employees.

The Company's Board of Directors not only places importance on the Company's internal control system but also recognizes the importance of using internal information to seek personal benefit or benefit for the relevant parties, whereby the Company monitors the use of internal information according to the law and good corporate governance as follows:

1. Policies and Procedures in monitoring the Directors and Executives

The Company has notified the Directors and the Executives to acknowledge the relevant notifications of the Securities and Exchange Commission which requires the Directors and Executives to take responsibility in reporting changes in the holding of securities to the Securities and Exchange Commission according to section 59 of the Securities and Exchange Act B.E. 2535 within 3 business days counting from the date that the change occurs, as well as to inform the Corporate Secretary in order to record the changes and summarize the number of securities held by the Directors and Executives individually and present them to the Board of Directors at the next meeting. Furthermore, a notification on penalties for violations or non-compliance with the mentioned regulations has been given to the Board of Directors and Executives for their acknowledgement and to strictly comply with the policies and laws related to the use of internal information.

2. Measures regarding the maintenance of internal information

2.1 Refrain from using internal information for personal or other parties' benefits

2.2 Specify and restrict the persons who may have access to the internal information, whereby the persons authorized to access the internal information shall not disclose the mentioned information to other parties until the information has been disclosed to the public in accordance with the various criteria.

2.3 Disclosure of information that is significant to the Company's performance through the channels of the Stock Exchange of Thailand for general acknowledgment prior to disclosing to particular groups of investors.

2.4 Insiders shall refrain from trading securities or wait until the information is disseminated to the general public and provide a sufficient time for them to assess the information.

3. Storage and prevention of internal information usage

3.1 The Company has policies and practices to monitor the use of internal information by the Directors, Executives, and employees to prevent incidents where the Directors, Executives, and employees retract internal information and use for personal or other parties' benefits. The Company's work regulations prohibit the Company's employees from revealing the Company's confidential information to outsiders or using their positions to improperly seek benefits for themselves or others. If there are violations it will be considered as a disciplinary offense.

3.2 The Company has a system to control the use of the Company's information by applying an information security system to control access to the system by specifying the suitable level of access to the Company's information for employees at different levels in accordance with their responsibilities.

3.3 The Company prohibits Executives with knowledge of internal information to take any action that is against section 241 of the Securities and Exchange Act, as well as other related rules.

Whereby in 2021, the Company did not have a legal dispute in which the Company was a party or counterparty, that may have a negative impact on the assets of the Company which are higher than 5% of the shareholders' equity at the latest fiscal year-end, including no lawsuits that significantly affect the Company's business operations and the Company does not have any lawsuit that did not arise from the Company's usual business operation in any significant way. (307-1, 419-1)

Creating community innovative inventors according to Sustainable Development Goals (SDGs)

Inventions created from creativity of "innovative inventors" will have the ultimate goal of solving poverty problems, especially in helping enhance efficiency in increasing agricultural production and translocation of clean water for household use. Furthermore, the majority of the inventors are SME entrepreneurs who can help to strengthen the economic growth of the community as well as emphasizing using local resources for circulation to create maximum benefits.

Objectives and **Expected Outcomes**

Objectives

92

1. To find ways to solve poverty of the people in the community through the invention creative process of community innovative inventors

2. To develop potential in research and innovation in order to solve social problems of people in the community

3. To create a network of partners from the local community, government sector and private sector for cooperation in the development of community innovative inventors

Output Indicators : Category

 Number or quantity of reduced social problems when inventions are put to actual use
 Number of community innovative inventors that have been through the process of potential development
 Number of inventions from community innovative inventors that receive extended support from community organization, agencies of the government sector, and private sector

Main target group

1. Interest group: Community inventors or group of community inventors, Quantity 10 persons/group

2. Changes that occur with the interest group

- Short-term: enhance potential in the development of innovation to be in line with solving social problems

- Long-term: can expand innovation to other communities in a wider circle, create cooperation in the development of innovation with agencies of the government sector and private sector

Secondary target group

Interest group : Local community, Quantity 10 communities
 Changes that occur with the interest group

- Short-term : inventions from community innovative inventors can be used to enhance effectiveness in resolving social problems

- Long-term : able to strengthen new generation of community innovative inventors in one's own community, and have the approach to create cooperation in order to concretely solve problems in the community

Extension and Expansion

1. Develop an extension or seek new ways from invention prototypes of community innovative inventor in order to achieve more effectiveness in solving social problems

 Strengthen new generation of community innovative inventors from different communities in order to provide an opportunity to develop the skills in solving a greater variety of social problem issues, such as crowded community, and polluted community
 Establish a network of supporters of community innovative inventors by cooperating with agencies of the government sector and other private sectors in order to create the development of community innovative inventors in different areas resulting in an increase in number and quality

Roles of cooperation between organizations (followed by circular chart that includes CH. Karnchang)

For innovative works and inventions that have passed the first-round selection, all 10 teams consisting of:

Smart farm IOT innovation created by farmers

Solar cell insect trap

Activated carbon furnace

Solar cell three wheel cart

Automatic candle production machine, community level

Machine that produces bricks for paving small roads

Wheelchair adapted for poor elderly and disabled persons

After this, all 10 community inventors will participate in the online learning process of four dimensions from experts, and each community inventor will go back to extend his/her innovation for an improvement in terms of work effectiveness, convenience in using, including expanded outcome through sale distribution of different channels prior to the selection of the best work and announcement of awarding the prize "Ultimate Community Innovative Inventor" in the future.

In addition, CH. Karnchang has contributed to helping the society in the past years, especially during the period of COVID-19, by offering assistance as follows:

CH. Karnchang jointly supported the urgent construction of accommodation for patients of field hospital for Chulalongkorn hospital, Thai Red Cross.

CH. Karnchang jointly supported Bhadra Maharajanusorn Foundation under the Royal Patronage of Her Royal Highness Princess Chulabhorn Krom Phra Srisavangavadhana in the Thai medical project to conquer the danger of COVID-19.

8

Responsibility towards customers and products

Based on the operating experiences of over 49 years and as a leading construction company in Thailand, CH. Karnchang emphasizes the importance of the customers by focusing on quality operations, ensuring work delivery by the due time with a quality of work that is effective and safe, in accordance with the standards required by the clients.

Key Performance in 2021

All construction projects of CH. Karnchang comply with the quality and safety standards.

CH. Karnchang's customer satisfaction survey results in the past years for every project have been within the average criteria of

Compliance with standards and safety

In the construction of various projects, CH. Karnchang is constantly aware of the standards, quality, and safety by upholding the achievement of the standards and safety as a mandatory practice in every construction project. In addition, standards and safety are also important tools that CH. Karnchang adopts in the management of procedures and in determining the steps during construction activities in order to ensure that the completed construction works are in accordance with the format and regulations following the various construction standards, as well as regulations on safety management at work both within the construction site and surrounding area.

Management Guidelines

CH. Karnchang has conducted studies on the specifications and various construction standards prescribed in the contracts and applies them to the various construction processes in order to achieve efficiency which shall be able to create trust from the construction inspector and the project owner at each step of the construction inspection. CH. Karnchang has also implemented construction plans and checking & corrective actions, which includes work scheduling and allocation of resources which will be used in the activities according to the work process appropriately throughout the duration of the construction project until its completion.

Sustainability Report

In 2021, all construction projects of CH. Karnchang were in compliance with the quality and safety standards which were required procedures and agreed upon under the construction contracts. Therefore, 100% of CH. Karnchang's construction projects were in total compliance with the related quality and safety standards and have passed all evaluations on quality and safety compliance by the construction inspector and the project owners for every project during the inspection process. In this regard, in 2021, CH. Karnchang did not receive complaints from any project owners regarding non-compliance with the related quality and safety standards.

Customer Satisfaction

CH. Karnchang pays the highest attention to the satisfaction of our "customers" or the "project owners" on the grounds that CH. Karnchang is a business providing construction services where there are expectations that the construction work delivered will be of quality, meet the standards of integrity, safety, punctuality, and engaging in social and environmental responsibilities during the operation.

During the operation of CH. Karnchang, operation is consistent with the quality management system ISO 9001/2015, and therefore it has been specified that a survey must be carried out at every construction project to check the satisfaction of the project owners/customers with data collection procedures including both qualitative and quantitative in order to receive information that is transparent and complete, and present the customer satisfaction survey results to the Company's Executives. If any comments or suggestions from the project owners/customers are observed, CH. Karnchang shall proceed to analyze and improve the operation to be consistent with the demands of the project owners/customers. Each year, CH. Karnchang sets the target satisfaction level of the project owners/customers to be no lower than the benchmark of "good", whereby the project owners/ customers satisfaction data shall be collected on a monthly basis.

Management Guidelines

..... (103-2)

CH. Karnchang has established methods for the issue of customer satisfaction by closely monitoring the various construction processes and procedures in terms of the quality of the construction, construction timing, safety of the operation, and the coordination to be within the frame of the established policies and operation plan, as well as establishing good relationships with our customers as the project owners, supporting the participation of the customers in providing feedback and suggestions in order to increase the customers' level of trust and satisfaction.

Customer Satisfaction Survey

CH. Karnchang arranges to have an evaluation of the customers' satisfaction by organizing a Customer Expectation and Satisfaction Questionnaire using the method of inquiring at meetings, interviews, or survey responses which are conducted on a monthly basis according to the Company's quality system. By which, the customer expectation and satisfaction questionnaire shall consist of the following:

In which, if the customers have shared their opinions and suggestions regarding the construction project, this will be stated in the questionnaire and will be brought up for consideration. The evaluation results achieved from the mentioned questionnaires shall be used further to continuously improve the confidence and satisfaction level from the customers.

Customer satisfaction survey results

Average score criteria from the customer satisfaction survey results are to be used as an indicator to determine the customers' satisfaction as follows:

In this regard, CH. Karnchang's customer satisfaction survey results in the past years for every project have been within the average criteria of "Good" and "Very Good".

In 2021, CH. Karnchang received complaints from the operation of every project a total of 32 times, whereby CH. Karnchang proceeded to improve and correct the results from the operations in order to respond to the needs and increase the customers' satisfaction.

Complaints report from all projects' operations between 2019-2021

Remarks: *The number of complaints which have been rectified

9 CH. Karnchang's Awards and Pride

Thailand Sustainability Investment (THSI) Award 2021

CH. Karnchang (PCL) received the Thailand Sustainability Investment (THSI) 2021 award from the Stock Exchange of Thailand as a registered company that is outstanding in its sustainable business operation, has strong business performance, provides stable stock return to shareholders, alongside having corporate social responsibility to all stakeholders of all sectors, society, and environment, under the ESG (Environment, Social and Governance or ESG) framework.

This year, CH. Karnchang received this award for the third year, and is also one of the securities in the calculation of the SETTHSI index, which reflects its sustainable business operation in all three dimensions and its responsiveness to stakeholders in all sectors.

Good Corporate Governance award for Thai Listed Companies of 2021

CH. Karnchang Public Company Limited received a score of "Excellent" in the assessment of corporate governance of Thai listed companies of 2021 from Thai Institute of Directors Association (IOD).

Shareholder's General Assembly Meeting Quality Assessment

CH. Karnchang Public Company Limited received an assessment score in the quality of Shareholders General Assembly meeting (AGM Checklist) in 2021, in the range between 90-99 by the Thai Investors Association.

Compliance with Environmental Standards Award

Mr. Sarote T. Suwan, Assistant Governor of the Mass Rapid Transit Authority of Thailand (MRTA) presented the outstanding award and follow-up prize to CH. Karnchang as the Company has consistently and comprehensively maintain the standards of compliance with the environmental standards from January-December 2021, for the construction project of the MRT Orange Line between Thailand Cultural Center – Minburi station, as support and motivation for the contractors who have demonstrated excellent performance in regards to the environment. In this regard, the MRTA has given importance to the audit on the environment, along with the construction of the MRT project under the responsibility of the MRTA, as well as being considerate of the quality of life of the public, communities, and society and striving to continuously maintain and improve the standards.
